

SECOND

ANNUAL REPORT

OF THE MANAGERS OF THE

Pennsylvania Institution

FOR THE

INSTRUCTION OF THE BLIND.

LOCATED IN PHILADELPHIA.

March 2, 1835.

OFFICERS.

PATRON—The Governor of the State.

PRESIDENT—Right Rev. William White, D. D.

VICE-PRESIDENTS.

P. S. Duponceau,	Edward Coleman,
William Y. Birch,	Nathan Dunn.

TREASURER—Frederick Fraley.

CORRESPONDING SECRETARY—J. Francis Fisher.

RECORDING SECRETARY—Davis B. Stacey.

CONSULTING PHYSICIAN—Philip S. Physick, M. D.

VISITING PHYSICIANS.

Caspar Morris, M. D.	J. Rhea Barton, M. D.
----------------------	-----------------------

MANAGERS.

John Vaughan,	John U. Fraley,
John A. Brown,	George Pepper,
Benj. W. Richards,	Abraham Miller,
Robert Maxwell,	Jacob Snider, jr.
Alexander D. Bache,	George Handy,
C. D. Meigs, M. D.	Alexander Symington.

SECOND ANNUAL REPORT.

THE Board of Managers, in presenting to the Contributors their *Second Annual Report*, have the happiness to assure them of the continued success of the undertaking—of the rapid advancement of the pupils in learning, in the mechanical arts, and in music—of the excellent moral discipline which has been preserved—and of the health and happiness which have been enjoyed in the Institution, under the vigilant and affectionate care of its Principal and Matron.

Eleven pupils have been admitted during the year;—one left the Institution in bad health, and soon afterwards died at his home. We have now twenty-one under our care, of whom nine are females. Eighteen are from within this State, one from the State of Delaware, one from Virginia, and one from South-Carolina.

Since the first Report, the Board have secured the services of Mr. J. B. Stout, as Assistant Teacher in the English branches; of Mr. A. Schmitz, as Instructor of Music; and of John Roxbury, a blind man from the Edinburg school, as Teacher of the mechanical arts.—The Board are happy to concur with Mr. Friedlander, in expressing their entire satisfaction with the manner in which the various departments have been filled.

The Annual Examination on the 23d of December, and a Concert on the 19th of February last, gave evi-

dence of the improvement of the pupils in the English branches and in Music. The German language is now taught; and it is expected that a course of Mathematical studies will soon be commenced. But, as the great majority of the pupils are poor, and dependent for their maintenance and education upon charity, it is particularly desirable that they should carry with them from the Institution, the means of supporting themselves hereafter. It is therefore, very satisfactory to state, that several handicraft arts have been added to those formerly taught; and the baskets, mattresses, door-mats, rugs and twine, made in the Institution, are such as would command a ready sale; that several of the girls knit and sew with great neatness; and that some other handicrafts will soon be introduced. Want of room for workshops, necessarily limits the operations of the pupils in the handicraft departments.

To call the attention of the inhabitants of this State to the subject of the Blind, and to announce to the afflicted in all districts, the advantages of our Institution, the Board not only sent its Circulars, and the necessary instructions for applicants, into all the counties; but induced the Principal, with one of the pupils, to make a very extensive tour during the month of July last. The exhibitions of the acquirements of our pupil excited a lively interest in all who witnessed them; but the applications for admission, which were anticipated as a consequence, have not been numerous from the interior of this State.

Shortly after the return of Mr. Friedlander, he accepted (with the approbation of the Board) an invitation from the citizens of West-Chester; and visited that town, with twelve of the pupils, whose examination excited so great an interest throughout the county, that committees were appointed in every township, to make collections

for this Institution, which have already reached a considerable amount.

A similar invitation was received from the citizens of Wilmington, in the month of September last, and accepted; when the services of many benevolent persons were enlisted in our cause: and on their solicitation and assurance, that an application to the Legislature of the State of Delaware would meet with success, if presented by the Managers, in company with their pupils, Messrs. Fraley and Snider, with the Principal and eight of the pupils, went to Dover in the month of January last. The exhibitions made before the Legislature, were highly satisfactory to them; and they have since made an appropriation for the support of several indigent pupils from their State. Exhibitions were also made before large audiences at Wilmington and Smyrna; and much kindness, hospitality, and liberality from the citizens of Delaware, were received during this visit, which the Board have great pleasure in acknowledging.

After this visit to Delaware, Messrs. Dunn and Richards, with the Principal, exhibited the proficiency of seven pupils, to the Legislature of New-Jersey; who, it is hoped, will be induced to secure by a handsome appropriation, the benefits of this Institution for the indigent Blind of that State.

In April last, the Institution was removed into Thirteenth st., where two houses, with intermediate lots, were taken on rent. In these houses, the present number of pupils are comfortably accommodated; but a few more only can be received; and space is much needed for the various manufactures. The members of the Board have therefore been very active in the endeavour to raise by contributions, the sum of 20,000 Dollars, upon which depends the grant of 10,000 Dollars from the State of

Pennsylvania, for a building. When this sum is secured, a lot will be purchased, and an edifice commenced; it being of great importance to relieve the Institution from the burthen of rent, and to provide accommodations for a much larger number of pupils. For, although the allowance from this State, of 160 Dollars for each indigent pupil, does not pay one-half of the expenses of 20 children, and if even the number were increased to 40, would not be nearly sufficient; yet proportionably, the expenditures would be very much reduced: and, independently of other motives to extend the charity, it is much more for our interest.

An application will be made to the Legislature of this State, for an increase of the allowance per pupil; and, should they augment it to 200 Dollars per annum, we might securely depend upon the charity of our fellow citizens, to supply what else may be wanting; and regard the permanence of the Institution as assured. At present, its income, (as will be seen in the accounts of the Treasurer, herewith submitted) is far below its outlay; and, although all the economy in the power of the Board, consistent with the comfort and advantage of the pupils, has been practised, it has been found necessary to encroach greatly on the ten thousand Dollars granted by the State, which it was hoped, might have been in part added to the permanent fund.

That our expenditures have been so great, will perhaps excite surprise in those acquainted only with the economy of other institutions of education; but, it must be recollected, that none of the ordinary apparatus of instruction, can be used by us: neither the slate nor black board, no common map or printed book; that the books, maps, and music sheets, with raised characters—the tables for calculating and writing—the musical instruments

—the machines and materials for manufactures, are all costly; and the Blind, from their peculiar privation, require both more attendants and more instruction, than any other children.

To increase a permanent fund, yielding interest, and to extend the number of annual subscribers, will be incumbent upon the Board of Managers for the ensuing year; and an appeal is confidently made to the benevolent, to further this effort, which the interest already excited in this community, by our Institution, authorizes us to hope.

Already, by this charity, have upwards of twenty children been raised from a state of helplessness, gloom and degradation; a burthen to industrious parents, or with a prospect for life of dependence on public charity, they are now receiving a means of honest maintenance. Deprived of all the enjoyments of the best of our senses, new sources of pleasure have been bestowed—new channels of information opened to them. Cut off by their calamity, from the ordinary pursuits and associations of others, we have raised them to the rank of their fellow-men; and taken from them the stamp of inferiority, which even pity had inflicted on their helplessness.—Whether we shall be able to continue this good work, and extend it to others, will depend upon the liberality with which our appeal is answered; and we see no reason to doubt the result.

By order, and on behalf of the
Board of Managers.

WILLIAM WHITE, *President*.

JACOB SNIDER, jr. *Rec. Sec'ry.*

Philadelphia. March 2, 1835.

Since the foregoing Report was submitted to the Contributors, the Board have received a communication from Mr. Snider, on the subject of PRINTING for the BLIND. In the course of last year, he devoted much time to the accomplishment of the printing the Gospel, according to St. Mark, for the use of the pupils of this Institution; and which has been to them a work of great utility and benefit. The whole expense for the apparatus and printing, was incurred by three members of the Board of Managers, the funds of the Institution not being adequate to engage in the work. Mr. Snider has liberally offered, (provided funds can be raised without infringing on those of the Institution) to have printed, the Gospel, according to St. John, from *copper plates*, in a form more condensed and convenient; the execution superior to any heretofore printed, and as durable as that of his former work; on the following terms:—

“For 100 copies, bound for use, and the copper plates to be delivered to the Institution, the sum of \$ 400.—For any number of copies over this number, at the rate of \$ 2. per copy:—or, he offers to have any work printed, containing as much matter as the one proposed, in 125 pages, size of 8 by 10 inches, for the same sum.”

The Managers regret, that the necessity of applying the funds to the erection of buildings, precludes their engaging at present in this important work. This statement is made in the hope, that those who are greatly interested in the further advancement of this branch of the education of the Blind, will be induced to furnish aid for the proposed undertaking. A specimen of the printing by this method is annexed; exhibiting more matter in the same space, and greater durability than any books yet printed for the Blind.
